Veeva Network 23R1.0.1 Data Governance

April 2023

Contents

Data governance

The data governance document describes data changes introduced in this release as of the publication date of this document.

Adding new fields to your Veeva OpenData subscription

When Veeva OpenData adds new fields to a country that you are subscribed to, you can add the field to the subscription so that it's ready to receive data and be managed by Veeva OpenData.

For information about adding new Veeva OpenData fields to your subscription, see the topic called Adding Veeva OpenData fields in the *Veeva Network Online Help*.

Enabling Veeva OpenData fields for extended use

Veeva OpenData fields can be enabled to load local data or third party data. A field can be managed by Veeva in some countries, managed by a third party source in other countries, or be owned by a customer in the remaining countries.

Administrators can view ownership of the data model fields, by country, in the Network user interface by navigating to **Data Model** and choosing the **Customer Master** data domain. Click **Export Data Model** or select an object to view specific field details.

 For more information about enabling Veeva OpenData fields for local or third party data use, see the topic called Enabling data model fields in the *Veeva Network Online Help*.

Data governance updates

No changes have been made to the reference data since the 23R1.0 Sandbox version of this document was published.

Field updates for all countries

Key Network field

A new field is added for all countries except Other Countries (ZZ).

The field will be automatically added to standard profile layouts, but it must be added to any custom profile layouts that you have created for these countries or regions.

The following field has been added to the HCO object:

- `key_network__v` – Indicates whether the HCO is a Key Network. Also known as IDN (Integrated Delivery Network).

Field label
- US – **IDN?**
- All other countries – **Key Network?**

This is a new field so it will be managed by Veeva OpenData by default. The field is read-only. It cannot be changed through data change requests.

License number field

The `license_number__v` field length is extended to 25 characters. Previously, the length was 20 characters.

Note: All field lengths are suggestions; they are not enforced in Veeva Network.

Field updates for Asia Pacific

The fields will be automatically added to standard profile layouts. They must be added to any custom profile layouts that you have created for these countries or regions.

Vietnam

The following field has been added to the HCO object:

- `citizen_id__v` – The government-assigned unique identifier for citizens

This is a new field so it will be managed by Veeva OpenData by default.

The following fields have been added to the License object:

- `initial_board_license_date__v` – Date license was first granted by the state licensing board.
- `effective_date__v` – Effective date for the license.

These are existing fields so they will not be managed by Veeva OpenData by default.

License body field

The `body__v` (licensing body full name) field is added for the following countries:

- India (IN)
- Indonesia (ID)
- Singapore (SG)
- Vietnam (VN)

This is an existing field so it will not be managed by Veeva OpenData by default.

Business type field

The `business_type__v` (licensing body full name) field is added for the following countries:

- Australia (AU)
- India (IN)
- Indonesia (ID)
- Korea (KR)
- Malaysia (MY)
- Philippines (PH)
- Singapore (SG)
- Thailand (TH)
- Vietnam (VN)

These are existing fields so they will not be managed by Veeva OpenData by default.

Field label changes for Thailand

The labels for the following fields have been updated for Thailand.

Field	Language	Previous Label	New Label
major_class_of_trade__v	th	Nหมวดหมู่หลักการค้า	Nหมวดหมู่
corporate_name__v	th	ชื่อบริษัท	ชื่อองค์กร

Field label change for Vietnam

The label for the following field has been updated for Vietnam.

Field	Language	Previous Label	New Label
alternate_name_1__v	vi	Họ và Tên thay thế 1	Tên gọi khác 1

Field updates for North America

The fields will be automatically added to the NAStandard profile layout for HCOs. They will be added in a new section called **Hierarchy**. They must be added to any custom profile layouts that you have created for the US.

United States

The following fields have been added to the HCO object for the US:

- `immediate_parent__v` – Entity ID of the HCO Parent with 'Ownership' Relationship Type.
- `hospital_parent__v` – Entity ID of the Hospital the HCO rolls up to.
- `regional_health_system__v` – Entity ID the HCO rolls up to that is a child of a Health System and has `key_hco_network__v` = 'Y'

These are new fields so they will be managed by Veeva OpenData by default. The fields are read-only. They cannot be changed through data change requests.

Top Parent field

The `top_parent__v` field is now read-only.

It will be added to the new **Hierarchy** section in the NAStandard HCO profile layout.
