Data governance

The data governance document describes data changes introduced in this release as of the publication date of this document.

Adding new fields to your Veeva OpenData subscription

When Veeva OpenData adds new fields to a country that you are subscribed to, you can add the field to the subscription so that it's ready to receive data and be managed by Veeva OpenData.

For information about adding new Veeva OpenData fields to your subscription, see the topic called [Adding Veeva OpenData fields](#) in the *Veeva Network Online Help*.

Enabling Veeva OpenData fields for extended use

Veeva OpenData fields can be enabled to load local data or third party data. A field can be managed by Veeva in some countries, managed by a third party source in other countries, or be owned by a customer in the remaining countries.

Administrators can view ownership of the data model fields, by country, in the Network user interface by navigating to **Data Model** and choosing the **Customer Master** data domain. Click **Export Data Model** or select an object to view specific field details.

For more information about enabling Veeva OpenData fields for local or third party data use, see the topic called [Enabling data model fields](#) in the *Veeva Network Online Help*.

Country support

Veeva OpenData data models have been added for the following countries:

- Pakistan (PK)

The country will be managed in the APAC OpenData instance.

The Pakistan data model is based on the Other Countries (ZZ) data model. The data model also includes additional fields so it is consistent with other APAC data models.

The activated reference codes are based on the reference codes that are activated for Other Countries (ZZ), along with additional reference codes supported by the APAC OpenData team.

Localization

English (EN) is used for the Network UI, data model, and reference codes.

Data privacy opt out

Veeva OpenData now manages HCP opt outs in the following country:

- Pakistan (PK)

Two data model fields have been enabled for these countries for the HCP object:

- `data_privacy_opt_out__v`
- `data_privacy_opt_out_date__v`

Records that are opted-out by Veeva OpenData do not display and cannot be accessed in downstream systems. This ensures data privacy for opted-out HCPs to satisfy regional regulatory requirements.

Opted-out countries

To review the list of opted-out countries, in the Admin console:

1. Click **Data Model > Data Domains** and choose the **Customer Master** domain.
2. Select the **Health Care Professional** object and find the `data_privacy_opt_out__v` field in the **Fields** section.
3. Click the field to review the list of opted-out countries that are managed by Veeva OpenData.

Field updates for all countries

HCP opt out field

The definition of the `opt_out__v` field is updated for countries that use the field.

New Definition	Previous Definition
Indicates a HCP wants to be opted out of OpenData. This is informational only.	Used to indicate if HCP does not wish to receive marketing materials, does not impact how data is stored.

Field updates for China

Parent HCO contact fields

The following 9 fields are added to the Parent HCO object for Hong Kong, Macao, and Taiwan:

- Email fields: `email_1__v`, `email_2__v`, `email_3__v`
- Fax fields: `fax_1__v`, `fax_2__v`, `fax_3__v`
- Phone fields: `phone_1__v`, `phone_2__v`, `phone_3__v`

Additional field details

Managed by OpenData? No. These are existing fields, so they will not be managed by OpenData by default.

Immediate data impact? No. Enabling these fields in your Network instance will not result in immediate data updates.

Profile layouts The fields are automatically added to standard profile layouts. They must be added to custom profile layouts created for these countries/ regions.

Field updates for EMEA

All EMEA countries

The following fields are no longer read-only for all countries managed by the EMEA OpenData team (this includes countries in Europe, the Middle East, and Africa):

- `healthcare_provider_id__v` (HCPs and HCOs) – Healthcare provider ID
- `healthcare_provider_id_2__v` (HCOs) – Healthcare provider ID 2

This means that data change requests can be submitted to update the field value.

Albania

The following existing HCP field has been added for Albania:

- `birth_date__v` – Full date of birth for HCP

Additional field details

Managed by OpenData?	No. This is an existing field, so it will not be managed by OpenData by default.
Immediate data impact?	No. Enabling this field in your Network instance will not result in immediate data updates.
Profile layouts	The field is automatically added to standard profile layouts. It must be added to custom profile layouts created for this country/ region.

Fields for France

The following existing HCP fields have been added for France:

- `grad_trg_start_date__v` – Grad training start date
- `grad_trg_end_date__v` – Grad training end date

Additional field details

Managed by OpenData?	No. These are existing fields, so they will not be managed by OpenData by default.
Immediate data impact?	No. Enabling these fields in your Network instance will not result in immediate data updates.
Profile layouts	The fields are automatically added to standard profile layouts. They must be added to custom profile layouts created for this country/ region.

Fields for Georgia, Moldova, Kazakhstan, Ukraine

Existing HCP and HCO fields have been added for these countries.

HCP fields

The following 14 fields have been added:

- `alternate_first_name__v` – Alternate first given name of the HCP
- `alternate_last_name__v` – Alternate family name/last name/surname of the HCP
- `hcp_focus_area_1__v` to `hcp_focus_area_10__v` (10 fields) - Focus area for HCP
- `hcp_status_reason__v` - Extra details about HCP status
- `nickname__v` - Self-selected first name by which the HCP prefers to be addressed, not from a legal or official source, and different from First Name

HCO fields

The following 6 fields have been added:

- `count_all_locn_md_do__v` - Number of MDs and DOs at all locations
- `count_all_locn_medstaff__v` - How many medical staff are there at all locations
- `count_beds__v` - Number of beds in HCO
- `count_medstaffff__v` - Number of medical staff at HCO
- `hco_tax_id__v` - Tax Number
- `vat_id__v` - Value Added Tax ID. Identifier for value added tax purposes.

Additional field details

Managed by OpenData?	No. These are existing fields, so they will not be managed by OpenData by default.
Immediate data impact?	No. Enabling these fields in your Network instance will not result in immediate data updates.
Profile layouts	The fields are automatically added to standard profile layouts. They must be added to custom profile layouts created for these countries/ regions.

Global data updates

The following sections describe reference data considerations and updates for applicable regions.

ALL COUNTRIES

The following changes have been applied:
