Data governance

The data governance document describes data changes introduced in this release.

Global data updates

The following sections describe reference data considerations and updates for applicable regions.

ALL REGIONS

The following fields have been added to the data model to support the new unmerge report templates:

- `custom_key_source_key_context__v` – Indicates whether an unmerge occurred with or without retaining keys, or a merge occurred.
- `custom_key_source_key_id__v` – ID associated with the custom key of the source from which the new key was created.

By default, the fields are not enabled. For more information, see the *Veeva Network 9.0.0.1 Release Notes*.

ANDORRA DATA UPDATES

The following additions have been applied:

| Object | Field | Reference Type | Code | English | Translation |
|--------|-------------------------|-------------------|------|---------------------------------------|-------------|
| HCO | major_class_of_trade__v | MajorClassofTrade | 40 | Residential Long-Term Care Facilities | - |
| | | | 50 | Animal Health Organization | - |
