## Data governance

---

The data governance document describes data changes introduced in this release as of the publication date of this document.

## Adding new fields to your Veeva OpenData subscription

---

When Veeva OpenData adds new fields to a country that you are subscribed to, you can add the field to the subscription so that it's ready to receive data and be managed by Veeva OpenData.

For information about adding new Veeva OpenData fields to your subscription, see the topic called [Adding Veeva OpenData fields](#) in the *Veeva Network MDM Online Help*.

## Enabling Veeva OpenData fields for extended use

---

Veeva OpenData fields can be enabled to load local data or third party data. A field can be managed by Veeva in some countries, managed by a third party source in other countries, or be owned by a customer in the remaining countries.

Administrators can view ownership of the data model fields, by country, in the Network MDM user interface by navigating to **Data Model** and choosing the **Customer Master** data domain. Click **Export Data Model** or select an object to view specific field details.

For more information about enabling Veeva OpenData fields for local or third party data use, see the topic called [Enabling data model fields](#) in the *Veeva Network MDM Online Help*.

## OpenData 2.0

---

Veeva OpenData is introducing the OpenData 2.0 data model. This update streamlines your data by refining the existing fields and new fields into a unified global standard that maintains localized accuracy.

The data model contains the following fields:

- a subset of existing OpenData 1.0 fields
- a subset of Common Data Architecture (CDA) fields
- several new fields

The new OpenData 2.0 data model will be added in the Network MDM 26R1.0 release. Details about the new fields and changes to existing fields are provided in this document.

For the full list of fields and to learn when Veeva OpenData will begin loading data into the new fields, follow these Veeva Connect communities:

- [OpenData – APAC](#) (available by invite only)
- [Veeva Brazil Commercial Community](#)
- [OpenData - Europe](#)
- [Veeva LatAm Commercial Community](#)
- [OpenData - US](#)

## SUPPORTED COUNTRIES

OpenData 2.0 is available for most countries supported by Veeva OpenData.

These countries are not supported:

- China
- Hong Kong
- Japan
- Macao

## SUPPORTED OBJECTS

OpenData 2.0 is available for the following objects:

- Health Care Organizations (HCOs)
- Health Care Professionals (HCPs)
- Addresses
- Parent HCOs

For detailed information about the OpenData 2.0 data model in Network MDM, see the [Veeva Network MDM 26R1.0 Release Notes](#).

## New fields for OpenData 2.0

---

The following fields will be added to Network MDM.

The fields are enabled by default in new Network MDM instances.

Existing customers can enable all fields in the OpenData 2.0 data model (**Settings > General Settings**) or enable the fields individually (**Data Model**).
