Veeva Network 24R2.0.2 Patch Release Notes

August 2024

Contents

Updates in this release

This patch resolves the following issues:

- SAP© Concur search results display 10 records only, but a maximum of 100 records is supported.

- Network Explorer does not display affiliation names as expected for custom objects.

- Queries run in the SQL Query Editor sporadically fail.

- In some situations, suspect match and bulk merge jobs fail with the following error: *Activity missing for entity*.

- In some situations, source subscriptions jobs fail with the following error: *cannot be cast to long*.
