Data governance

The data governance document describes data changes introduced in this release as of the publication date of this document.

Adding new fields to your Veeva OpenData subscription

When Veeva OpenData adds new fields to a country that you are subscribed to, you can add the field to the subscription so that it's ready to receive data and be mastered by Veeva OpenData.

For information about adding new Veeva OpenData fields to your subscription, see the topic called *Adding Veeva OpenData fields* in the *Veeva Network Online Help*: https://docs-vdm.veevanetwork.com/doc/vndocad/Content/Home.htm.

Enabling Veeva OpenData fields for extended use

Veeva OpenData fields can be enabled to load local or third party master data. A field can be Veeva-mastered in some countries, mastered by a third party source in other countries, or be owned by a customer in the remaining countries.

Administrators can view ownership of the data model fields, by country, in the Network user interface by navigating to **Data Model > Network Data Model**. For more information about enabling Veeva OpenData fields for local or third party data use source, see the topic called *Enabling data model fields* in the *Veeva Network Online Help*.

Global data updates

The following sections describe reference data considerations and updates for applicable regions.

FIELDS ADDED FOR EU VEEVA OPENDATA

The `grade__v` (grade or rank of the HCP as defined by the national healthcare authority) mastered field has been added for the HCP entity for the following EU countries:

- France (FR)
- Great Britain (GB)
- Ireland (IE)

The `grade__v` field is populated with reference codes from the new HCPGrade reference type. Administrators can review the reference codes for each country by navigating to **Data Model > Reference Data**.
