Veeva Network 19R2.1.1 Data Governance

September 2019

Contents

Data governance

The data governance document describes data changes introduced in this release as of the publication date of this document.

Adding new fields to your Veeva OpenData subscription

When Veeva OpenData adds new fields to a country that you are subscribed to, you can add the field to the subscription so that it's ready to receive data and be mastered by Veeva OpenData.

For information about adding new Veeva OpenData fields to your subscription, see the topic called Adding Veeva OpenData fields in the *Veeva Network Online Help*.

Enabling Veeva OpenData fields for extended use

Veeva OpenData fields can be enabled to load local or third party master data. A field can be Veeva-mastered in some countries, mastered by a third party source in other countries, or be owned by a customer in the remaining countries.

Administrators can view ownership of the data model fields, by country, in the Network user interface by navigating to **Data Model > Network Data Model**. For more information about enabling Veeva OpenData fields for local or third party data use source, see the topic called Enabling data model fields in the *Veeva Network Online Help*.

Data governance updates

No reference data updates have been added since the Sandbox version.

Global data updates

The following sections describe reference data considerations and updates for applicable regions.

NEW COUNTRIES SUPPORTED

A data model has been added for eight new countries:

- Armenia (AM)
- Azerbaijan (AZ)
- Georgia (GE)
- Kyrgyzstan (KG)
- Moldova (MD)
- Tajikistan (TJ)
- Turkmenistan (TM)
- Uzbekistan (UZ)

The reference data is a union between the reference codes enabled for Other Countries (ZZ) and the reference codes enabled for Russia (RU).

The data model for these countries is a union between the Other Countries (ZZ) and Russian (RU) data models.

To view the data model for these new countries, in the Admin console, click **Data Model > Network Data Model**. On the Network Data Model page, expand the **Country** list and select the country.

Localization

English is used for the Network UI and the data model for these countries. Russian is used for the reference data.

NEW FIELDS

The following field has been added for the address object:
- `geo_accuracy_code__v` – A value to access the quality of the generated geocodes.

The field is enabled by default in new Network instances. Administrators can enable the field for existing Network instances.

For more information, see the Geocodes topic in the Veeva Network 19R2.1.1 Release Notes.

VEEVA OPENDATA EMAIL SUBSCRIPTIONS

A separate email subscription has been added to OpenData subscriptions for both Australia (AU) and New Zealand (NZ).

Customers who already subscribe to OpenData for these countries will be automatically subscribed to the separate email subscription on their AU or NZ OpenData subscription page.

New customers for either AU or NZ OpenData can subscribe to email data by contacting Veeva OpenData. When the email subscription is enabled, select the **Include Email Addresses** setting in the OpenData subscription for the country (**System Interfaces > Veeva OpenData Subscriptions**) to start receiving email data.

This change aligns AU and NZ OpenData with other OpenData regions and gives you the option to manage email data locally or have OpenData manage it for you. There is no additional cost for email data in AU or NZ.

ALL COUNTRIES

The following changes have been applied:

Object	Field	Reference Type	Code	Description	Translation
HCP, Address, License	birth_state__v, administrative_area__v, license_admin_area__v	AddressAdminArea	KG-GO	Osh (City)	Gorod Oš
			TJ-DU	Dushanbe	
			TJ-RA	nohiyahoi tobei jumhurí	

AUSTRIA

The following changes have been applied:

Object	Field	Reference Type	Code	Description	Translation
HCP	prefix__v	HCPPrefix	DR	Doctor	Arzt

BELGIUM

The following changes have been applied:

Object	Field	Reference Type	Code	Description	Translation
HCP	professional_title__v	HCPProfessionalTitle	NIC	Nurse-in-charge	Infirmier en Chef

CANADA

The following fields have been added for the parent HCO object:
- `entity_address_vid__v` – Network entity ID (VID) of the address on the entity that owns the ParentHCO relationship.
- `parent_hco_address_vid__v` – Network entity ID (VID) of the address from the related Parent HCO.

CHINA

The following changes have been applied:

Object	Field	Reference Type	Code	Description	Translation
HCP, HCO, License	primary_department_class__v, department_class__v	DepartmentClass	235	Reproductive Center	生殖中心
			236	Reproductive Center Administration	生殖中心行政
			237	Reproductive Center Care Group	生殖中心护理组
			238	Reproductive Center Clinical Group	生殖中心临床组
			239	Reproductive Center Equipment Division	生殖中心设备科
			240	Reproductive Center Laboratory	生殖中心实验室
			241	Reproductive Center Institute	生殖中心研究所

Object	Field	Reference Type	Code	Description	Translation
			242	Thyroid Surgery	甲状腺外科
			243	Surgery_Anorectal Surgery	外科_肛肠外科
			244	Molecular Diagnostics	分子诊断科
			245	Translational Medicine Center (Lab)	转化医学中心（实验室）

GERMANY

The following changes have been applied:

Object	Field	Reference Type	Code	Description	Translation
HCP	prefix__v	HCPPrefix	DR	Doctor	Arzt

JAPAN

The following set of fields have been enabled for the HCP object:

- `credentials_1___v` to `credentials_5___v` – Credentials for the HCP.

The following changes have been applied:

Object	Field	Reference Type	Code	Description	Translation
HCO	hco_accreditation_1__v to hco_accreditation_10__v	HCO Accreditation	CT6	Advanced Cancer Treatment (Regional)	がん診療連携拠点病院：地域（高度型）
HCP	credentials_1__v to credentials_5__v	HCP Credentials	JAAM1	Japanese Association for Acute Medicine, Board Certified Member	日本救急医学会 救急科専門医

LIECHTENSTEIN

The following changes have been applied:

Object	Field	Reference Type	Code	Description	Translation
HCP	prefix__v	HCPPrefix	DR	Doctor	Arzt

LUXEMBOURG

The following changes have been applied:

Object	Field	Reference Type	Code	Description	Translation
HCP	professional_title__v	HCPProfessionalTitle	NIC	Nurse-in-charge	Infirmier en Chef

NETHERLANDS

The following field has been added for the HCP object:
- `registration_id__v` – An alphanumeric registration ID for HCPs.

The following changes have been applied:

Object	Field	Reference Type	Code	Description	Translation
HCP	prefix__v	HCPPrefix	DR	Doctor	Doctor
HCP	professional_title__v	HCPProfessionalTitle	AESSTAFF	Aesthetic Staff	Huidtherapeut
HCP, Parent HCO	primary_relation_type__v, relationship_type__v	RelationType	AESSTAFF	Aesthetic Staff	Huidtherapeut

SWITZERLAND

The following changes have been applied:

Object	Field	Reference Type	Code	Description	Translation
HCP	prefix__v	HCPPrefix	DR	Doctor	Arzt

Global data inactivations

The following sections list reference codes that have been inactivated by Veeva OpenData for the countries listed. Veeva OpenData does not use these codes in their data; you may choose to update reference code mappings accordingly unless they are required by your own data.

POLAND

The following changes have been applied:

Object	Field	Reference Type	Code	Description (EN)
HCP, ParentHCO	primary_relation_type__v, relationship_type__v	RelationType	CHANU	Senior Nurse / Charge Nurse / Ward Sister

Translation updates

The following sections describe translation updates for applicable regions.

ENGLISH - AMERICAN
