Data governance

The data governance document describes data changes introduced in this release as of the publication date of this document.

Adding new fields to your Veeva OpenData subscription

When Veeva OpenData adds new fields to a country that you are subscribed to, you can add the field to the subscription so that it's ready to receive data and be mastered by Veeva OpenData.

For information about adding new Veeva OpenData fields to your subscription, see the topic called Adding Veeva OpenData fields in the *Veeva Network Online Help.*

Enabling Veeva OpenData fields for extended use

Veeva OpenData fields can be enabled to load local or third party master data. A field can be Veeva-mastered in some countries, mastered by a third party source in other countries, or be owned by a customer in the remaining countries.

Administrators can view ownership of the data model fields, by country, in the Network user interface by navigating to **Data Model > Network Data Model**. For more information about enabling Veeva OpenData fields for local or third party data use source, see the topic called Enabling data model fields in the *Veeva Network Online Help*.

Data governance updates

No changes have been made to the reference data since the 20R3.0 Sandbox version of this document was published.

Field updates for European countries

Belgium

A new field has been added to the HCO object:

- `apb_id__v` – Belgium Pharmaceutical Association. The unique identifier for each pharmacy (retail or hospital) in Belgium.

Italy

A new field has been added to the HCP object:

- `fnomceo_id__v` – Federazione Nazionale degli Ordini dei Medici Chirurghi e degli Odontoiatri. The unique identifier for HCPs in Italy.

Updates for several countries

Fields have been added to the HCP and ParentHCO objects for the following countries:

- Bosnia (BA)
- Macedonia (MK)
- Montenegro (ME)
- Serbia (RS)

A new mastered field has been added to the HCP object:

- `hcp_status_reason__v` - Extra details about HCP status.

An existing field has been added to the ParentHCO object.

- `parent_hco_status_reason__v` - Extra details about relationship status.

    This is an existing field, so it is not mastered for these countries.

These fields are enabled by default for new customers. Existing customers can enable these fields in the Network data model.

Field updates for Latin American countries

Brazil

A new field has been added to the HCP entity:

- `data_privacy_opt_out__v` – Used to indicate if HCP has directed OpenData to opt them out. Records are masked in downstream systems.

Field updates for North American countries

United States

New fields have been added to the HCO object:

- `pharmacy_immunization__v` – An indicator of whether a patient can receive immunization services at a pharmacy.

  This is a reference type field that use a new reference list called `HCOPharmImmun`. The possible values are *Yes* and *No*.

- `pharmacy_window____v` – An indicator of whether a pharmacy has a drive-up window.

  This is a Boolean field that uses the `BooleanReference` list.

A new field has been added to the HCP object:

- `linkedin_url__v` – HCP's LinkedIn profile URL.
