## Data governance

---

The data governance document describes data changes introduced in this release as of the publication date of this document.

## Adding new fields to your Veeva OpenData subscription

---

When Veeva OpenData adds new fields to a country that you are subscribed to, you can add the field to the subscription so that it's ready to receive data and be managed by Veeva OpenData.

For information about adding new Veeva OpenData fields to your subscription, see the topic called [Adding Veeva OpenData fields](#) in the *Veeva Network Online Help*.

## Enabling Veeva OpenData fields for extended use

---

Veeva OpenData fields can be enabled to load local data or third party data. A field can be managed by Veeva in some countries, managed by a third party source in other countries, or be owned by a customer in the remaining countries.

Administrators can view ownership of the data model fields, by country, in the Network user interface by navigating to **Data Model** and choosing the **Customer Master** data domain. Click **Export Data Model** or select an object to view specific field details.

For more information about enabling Veeva OpenData fields for local or third party data use, see the topic called [Enabling data model fields](#) in the *Veeva Network Online Help*.

## Data privacy opt out

---

Veeva OpenData now manages HCP opt outs for South Korea.

Two data model fields will be enabled for the HCP object for this country:

- `data_privacy_opt_out__v`
- `data_privacy_opt_out_date__v`

Records that are opted-out by Veeva OpenData do not display in the Network UI and cannot be accessed in downstream systems. This ensures data privacy for opted-out HCPs to satisfy regional regulatory requirements.

To review the list of opted-out countries in the `data_privacy_opt_out__v` field:

1. In the Admin console, click **Data Model > Data Domains > Customer Master** and select the **Health Care Professional** object.
2. Click the `data_privacy_opt_out__v` field to open it and see opted-out countries.

## Geo subdivision fields

---

The following geo subdivision fields are now available for the address object in the United Kingdom:

- `geo_subdivision__v`
- `geo_subdivision_label__v`
- `geo_subdivision_2__v`
- `geo_subdivision_2_label__v`

These fields are part of the Geo Subdivision and Geo Subdivision 2 data subscriptions available from Veeva OpenData.

For more information, see the [Geo Subdivision data](#) topic in the *Veeva Network Online Help*.

## Formatted name

---

A custom calculation has been added for the `formatted_name__v` field for South Korea. The formatted name uses values from several name fields to display a complete name for an HCP.

HCP names for South Korea are calculated using these Veeva fields in the following order:

- `last_name__v + first_name__v`

The formatted name displays on the profile page.

## Field updates for North America

---

New fields have been added to the HCP entity for the United States:

- `affinity_score_overall_digital__v` – Overall score for an HCP's digital activity, including spending time online for personal use on entertainment, news, and mass media sites.
- `affinity_score_brand_site__v` – A score which indicates the HCP's propensity to visit Brand websites.
- `affinity_score_health_content__v` – A score which indicates the HCP's propensity to visit websites that contain healthcare related data.

The fields are a field set that will be managed by OpenData by default.

These new fields support the Digital Affinity Score subscription for US OpenData subscriptions that was released in version 21R2.1.3. The fields will display in the Network data model only if the subscription is enabled in your Network instance.

For more information, see the [Digital Affinity Score data subscription](#) topic in the *Veeva Network Online Help*.

## Field updates for Europe

---

Fields have been added for several countries. These fields will be automatically added to standard profile layouts, but they must be added to any custom profile layouts that you have created for these countries or regions.

### Registration ID field – HCP object

The existing `registration_id__v` field has been added to the HCP object for the following countries:

- Croatia (HR)
- North Macedonia (MK)
- Romania (RO)
- Serbia (RS)

This is an existing field, so it is not managed by Veeva OpenData by default.

### Registration ID field – HCO object

The existing `registration_id__v` field is added as a new field on the HCO object for the following countries:

- Bulgaria (BG)
- North Macedonia (MK)

This is a new field for the HCO object, so it is managed by Veeva OpenData by default.

### Tax ID field

The existing `hco_tax_id__v` field has been added for the HCO object for the following country:

- North Macedonia (MK)

This is an existing field, so it is not managed by Veeva OpenData by default.

### Field updates for Asia Pacific

---

The fields will be automatically added to the AU standard profile layouts, but they must be added to any custom profile layouts that you have created for this country.

The following existing fields have been added to the HCP object for South Korea (KR):

- `alternate_last_name__v`
- `alternate_first_name__v`
- `alternate_middle_name__v`
- `opt_out__v`
- `fellow__v`
- `grad_year__v`
- `hcp_focus_area_1__v` to `hcp_focus_area_10__v`
- `nickname__v`

These are existing fields so they are not managed by Veeva OpenData by default.

## Global data updates

---

The following sections describe reference data considerations and updates for applicable regions.

### ALBANIA

The following changes have been applied:

Object	Field	Reference Type	Code	Description (EN)	Translation
HCP	professional_title__v	HCPProfessionalTitle	ASST	Assistant	
			AW	Ambulance workers	
			COOK	Head chef	
			DPR	Dental Prosthetist	
			HSM	Health Service Manager	
			LAB	Laboratory Technician	
			MSEC	Medical Secretary	
			OHP	Other Health Professionals	
			ORTHOP	Orthopedist-Orthotist	
			POD	Podiatrist	
			SGO	Senior Government Official	
			SMR	Shop Manager	
			TCH	Teacher	
			TECH	Technology Engineer	
			VET	Veterinarian	
VIS	Eye Care Professionals				

**ANDORRA**

The following changes have been applied:

Object	Field	Reference Type	Code	Description (EN)	Translation
HCP	professional_title__v	HCPProfessionalTitle	AESSTAFF	Aesthetic Staff	Esteticista
			ASST	Assistant	Personal administrativo
			AUXPUE	Childcare assistant	Auxiliar de guardería y educación infantil
			AW	Ambulance workers	Técnico en emergencias sanitarias
			DPR	Dental Prosthetist	Protésico dental
			HSM	Health Service Manager	Director/Gestor sanitario
			LAB	Laboratory Technician	Técnico de laboratorio
			MEDAS	Medical Assistant	Auxiliar médico
			MSEC	Medical Secretary	Secretario/a médico
			OHP	Other Health Professionals	Otros profesionales de la salud
			ORTHOP	Orthopedist-Orthotist	Técnico en ortoprótesis
			SGO	Senior Government Official	Personal del Gobierno
			SMR	Shop Manager	Director/Jefe de ventas
			TCH	Teacher	Docente
			TECH	Technology Engineer	Ingeniero industrial hospitalario
VIS	Eye Care Professionals	Profesional de la visión			

## AUSTRIA

The following changes have been applied:
