Data governance

The data governance document describes data changes introduced in this release as of the publication date of this document.

Adding new fields to your Veeva OpenData subscription

When Veeva OpenData adds new fields to a country that you are subscribed to, you can add the field to the subscription so that it's ready to receive data and be managed by Veeva OpenData.

For information about adding new Veeva OpenData fields to your subscription, see the topic called Adding Veeva OpenData fields in the *Veeva Network Online Help*.

Enabling Veeva OpenData fields for extended use

Veeva OpenData fields can be enabled to load local data or third party data. A field can be managed by Veeva in some countries, managed by a third party source in other countries, or be owned by a customer in the remaining countries.

Administrators can view ownership of the data model fields, by country, in the Network user interface by navigating to **Data Model** and choosing the **Customer Master** data domain. Click **Export Data Model** or select an object to view specific field details.

 For more information about enabling Veeva OpenData fields for local or third party data use, see the topic called Enabling data model fields in the *Veeva Network Online Help*.

Country support

Veeva OpenData data models have been added for the following regions:

- Hong Kong (HK)
- Macao (MO)
- Taiwan (TW)

The data models are based on the Other Countries (ZZ) data model. The data model also includes additional fields, so they are consistent with the China OpenData data model.

The activated reference codes are based on the reference codes that are activated for Other Countries (ZZ), along with additional reference codes supported by the China OpenData team.

Localization

Chinese (zh) and Traditional Chinese (zh-TW) will be used for the Network UI, data model fields, and reference data.

New language

Albanian (SQ) is now supported as a reference language. It is not supported for Network data model fields or for the Network UI.

This enhancement is enabled in your Network instance by default.

Select the language for reference codes

To view reference codes in this language:

1. On the Network menu bar, click **My Profile**.
2. In the **Settings** section, expand the **Language** list and select **Albanian**.
3. **Apply** your changes.

Formatted name

HCO and HCP name formatting rules have been added for the following regions:

- Hong Kong (HK)
- Macao (MO)
- Taiwan (TW)

The formatted name displays on the profile page.

HCO Name calculation

The formatted name for HCOs uses the `corporate_name__v` field.

HCP Name calculation

HCP names will use the `full_name__v` field.

If the `full_name__v` field is blank, the formatted name will be calculated using these Veeva fields in the following order:

- `last_name__v` + `first_name__v`

This enhancement is enabled by default in your Network instance.

Field updates for all countries

The field will be automatically added to standard profile layouts, but it must be added to any custom profile layouts that you have created for these countries or regions.

A new field has been added to the HCP object.

- `veeva_link_url__v` – A hyperlink to the HCP's profile on Veeva Link.

The field is added for all countries supported by Veeva OpenData except for the following countries or regions:

- China (CN)
- Hong Kong (HK)
- Japan (JP)
- Macao (MO)
- Taiwan (TW)
- Other Countries (ZZ)

This is a new field, so it will be managed by Veeva OpenData. It is disabled by default.

Field updates for Europe

The fields will be automatically added to standard profile layouts, but it must be added to any custom profile layouts that you have created for these countries or regions.

Greece

Two fields have been added to the HCP object for Greece:

- `alternate_first_name__v` – Alternate first name of the HCP.
- `alternate_last_name__v` – Alternate last name of the HCP.

These are existing fields, so they are not managed by Veeva OpenData by default.

All European countries

The following field is enabled for all supported European countries:

- `opt_out__v` – Indicates if the HCP does not wish to receive marketing materials. It does not impact how data is stored.
