Data governance

The data governance document describes data changes introduced in this release as of the publication date of this document.

Adding new fields to your Veeva OpenData subscription

When Veeva OpenData adds new fields to a country that you are subscribed to, you can add the field to the subscription so that it's ready to receive data and be managed by Veeva OpenData.

For information about adding new Veeva OpenData fields to your subscription, see the topic called [Adding Veeva OpenData fields](#) in the *Veeva Network Online Help*.

Enabling Veeva OpenData fields for extended use

Veeva OpenData fields can be enabled to load local data or third party data. A field can be managed by Veeva in some countries, managed by a third party source in other countries, or be owned by a customer in the remaining countries.

Administrators can view ownership of the data model fields, by country, in the Network user interface by navigating to **Data Model** and choosing the **Customer Master** data domain. Click **Export Data Model** or select an object to view specific field details.

For more information about enabling Veeva OpenData fields for local or third party data use, see the topic called [Enabling data model fields](#) in the *Veeva Network Online Help*.

Data Governance document updates

No changes have been made to the Data Governance document since it was published for the Sandbox release.

Formatted name updates

The custom calculation has been updated for the `formatted_name__v` field for Vietnam. The formatted name uses values from several name fields to display a complete name for an HCP.

This update is enabled by default in your Network instance.

New name calculation

HCP names for Vietnam are calculated using these Veeva fields in the following order:

```
last_name__v + middle_name__v + first_name__v
```

Previously, the name calculation was the following:

```
last_name__v + first_name__v
```

The formatted name displays on the profile page.

Field updates for all countries (except ZZ countries)

Key Network field

The following field has been added to the HCO object:

- `key_hco_network_alias__v` – Alias for Key HCO Network/IDN.

This field is added to support the new Key HCO Network Search Settings feature in Network. For information about this feature, see the “Searching within Key Networks” topic in the *Veeva Network 23R2.0 Release Notes*.

The field cannot be changed through data change requests. It can be updated using Data Updater or Source Subscription jobs.

This is a new field so it will be managed by Veeva OpenData by default. If the Key HCO Network Search Settings feature is enabled in your Network instance, the field is also enabled and displays in the data model.

The field will be added to standard profile layouts. You can add it to any custom profile layouts that you have created for these countries or regions.

Field updates for Asia Pacific

Vietnam

Labels are updated for the following fields on the HCP object:

Field	Previous Label for Vietnam	New Label for Vietnam
<code>first_name__v</code>	Họ	Tên
<code>last_name__v</code>	Tên	Họ

South Korea

The following fields have been added to the HCO object:

- `count_beds__v` – Number of beds in HCO.
- `healthcare_provider_id__v` – Healthcare Provider ID

These fields existed previously and might be used for customer-managed data in these countries, so they will not be automatically managed by Veeva OpenData. For more information, see the section called *Adding new fields to your OpenData subscription*.

The fields will be automatically added to standard profile layouts. They must be added to any custom profile layouts that you have created for these countries or regions.

Licensing body field

The `licensing_body__v` field has been added to the License object for the following countries:

- India (IN)
- Indonesia (ID)
- Vietnam (VN)

This field existed previously and might be used for customer-managed data in these countries, so it will not be automatically managed by Veeva OpenData. For more information, see the section called *Adding new fields to your OpenData subscription*.

The field will be automatically added to standard profile layouts. It must be added to any custom profile layouts that you have created for these countries or regions.

Medical degree fields

Medical degree fields have been added to the HCP object for the following countries:

- Australia (AU)
- India (IN)
- Indonesia (ID)
- Malaysia (MY)
- Philippines (PH)
- Singapore (SG)
- South Korea (KR)
- Thailand (TH)
- Vietnam (VN)

The following fields are added:

- `medical_degree_3__v`
- `medical_degree_4__v`
- `medical_degree_5__v`

These fields are part of a field set called **All Medical Degrees**.

Note: The `medical_degree_1__v` and `medical_degree_2__v` fields are already enabled for these countries.

These fields existed previously and might be used for customer-managed data in these countries, so they will not be automatically managed by Veeva OpenData. For more information, see the section called *Adding new fields to your OpenData subscription*.

The fields will be automatically added to standard profile layouts. They must be added to any custom profile layouts that you have created for these countries or regions.

Field updates for Latin America

Professional title field

The `professional_title__v` field has been added to the HCP object for the following countries:

- Argentina (AR)
- Bahamas (BS)
- Barbados (BB)
- Bermuda (BM)
- Bolivia (BO)
- Brazil (BR)
- Cayman Islands (KY)
- Chile (CL)
- Colombia (CO)
- Costa Rica (CR)
- Curacao (CW)
- Dominican Republic (DO)
- Ecuador (EC)
- El Salvador (SV)
- Guatemala (GT)
- Honduras (HN)
- Jamaica (JM)
- Mexico (MX)
- Nicaragua (NI)
- Panama (PA)
- Paraguay (PY)
- Peru (PE)
- Trinidad & Tobago (TT)
- Uruguay (UY)

This field existed previously and might be used for customer-managed data in these countries, so it will not be automatically managed by Veeva OpenData. For more information, see the section called *Adding new fields to your OpenData subscription*.

The field will be automatically added to standard profile layouts. It must be added to any custom profile layouts that you have created for these countries or regions.

Field updates for North America

United States

The following field has been added to the HCP object:

- `telehealth__v` – Flag to indicate whether a clinician offers telehealth services over audio and/or video.

This is a new field so it will be managed by Veeva OpenData by default. It is enabled by default in new Network instances. Administrators can enable it for their existing Network instances.

The field will be added to standard profile layouts. You can add it to any custom profile layouts that you have created for this country.

Network Hashtag

The `#telehealth` hashtag is added to your Network instance to help you quickly find HCPs that offer these services.

Global data updates

The following sections describe reference data considerations and updates for applicable regions.

ALBANIA

The following changes have been applied:

Object	Field	Reference Type	Code	Description (EN)	Translation
HCP	primary_specialty_group__v	SpecialtyGroup	G-ADM	Addiction Medicine	Mjekësi e Shtojcave
			G-AI	Allergy & Immunology	Alergji dhe Imunologji
			G-AMD	Administrative Medicine	Mjekësi Administrative
			G-AN	Anaesthetics	Anesteziologji
			G-BHSS	Behavioral Health & Social Services	Shëndetësia e sjelljes dhe Shërbime Shoqërore
			G-CD	Cardiology	Kardiologji
			G-CH	Chiropractic Medicine	Mjekësi Kiropraktike
			G-CLI	Clinical Informatics	Informatika Klinike

Global data inactivations

The following sections list reference codes that have been inactivated by Veeva OpenData for the countries listed. Veeva OpenData does not use these codes in their data; you may choose to update reference code mappings accordingly unless they are required by your own data.

AUSTRIA

The following changes have been applied:

Object	Field	Reference Type	Code	Description (EN)
HCP, HCO	specialty_1__v to specialty_10__v	Specialty	DEE	Emergency Dentistry
			EQM	Equine Medicine
			GYN	Preventative Healthcare
			NB	Neurobiology
			ON	Medical Oncology
			SAM	Small Animal Medicine
			SLP	Speech & Language Pathology
			VERE	Venereology

ISRAEL

The following changes have been applied:

Object	Field	Reference Type	Code	Description (EN)
HCP, HCO	specialty_1__v to specialty_10__v	Specialty	NDP	Neurodevelopmental Disabilities (Ped)

PHILIPPINES

The following changes have been applied:

Object	Field	Reference Type	Code	Description (EN)
HCO	hco_type__v	HCOType	11:12	Pharmacy, Compounding Pharmacy
			32_23	Hospital, Mental Health
			32_33	Hospitals, Maternity Hospital
			36_1	Health Care System Administration, Government Health Administration
			4:6	Organization, Hospital

Translation updates

The following sections describe translation updates for applicable regions.

ESTONIAN

The following changes have been applied:

Object	Field	Reference Type	Code	Previous Translation	New Translation
HCP, HCO	specialty_1__v to specialty_10__v	Specialty	CCE		Intensiivõendus

HEBREW

The following changes have been applied:

Object	Field	Reference Type	Code	Previous Translation	New Translation
HCP, HCO	specialty_1__v to specialty_10__v	Specialty	30		מקצועות מעבדה קליניים
			AN		הרדמה
			ATP		אנטומיה פתולוגית
			CCE		טיפול נמרץ כללי
			CCP		טיפול נמרץ ילדים
