Data governance

The data governance document describes data changes introduced in this release as of the publication date of this document.

Adding new fields to your Veeva OpenData subscription

When Veeva OpenData adds new fields to a country that you are subscribed to, you can add the field to the subscription so that it's ready to receive data and be managed by Veeva OpenData.

For information about adding new Veeva OpenData fields to your subscription, see the topic called [Adding Veeva OpenData fields](#) in the *Veeva Network Online Help*.

Enabling Veeva OpenData fields for extended use

Veeva OpenData fields can be enabled to load local data or third party data. A field can be managed by Veeva in some countries, managed by a third party source in other countries, or be owned by a customer in the remaining countries.

Administrators can view ownership of the data model fields, by country, in the Network user interface by navigating to **Data Model** and choosing the **Customer Master** data domain. Click **Export Data Model** or select an object to view specific field details.

For more information about enabling Veeva OpenData fields for local or third party data use, see the topic called [Enabling data model fields](#) in the *Veeva Network Online Help*.

Common Data Architecture for Life Sciences (CDA)

CDA is a new industry standard for referring to HCPs, HCOs, clinical operations, and products and diseases. All life sciences organizations can use CDA to communicate and collaborate more effectively with each other using these universal data components.

For more information about this open standard, see veeva.com/cda/.

CDA FOR NETWORK, OPENDATA, AND VAULT CRM

Vault CRM, Network, and OpenData are adopting CDA at the same time (August 2024). New customers can begin using CDA from the start. Existing customers can choose to enable CDA in their Network instance.

In Network version 24R2.0, the CDA data structure supports the following components:

- **Entities** – HCP, Address
- **Attributes** - 50 new fields. All fields contain the `_cda__v` suffix except the `veevaid__v` field.
- **Picklists** - New reference types and reference codes. Multivalued reference fields are supported.

CDA DATA MODEL FIELDS

The following fields have been added for the HCP and Address objects.

Note: CDA fields do not impact the Veeva legacy fields. In this release, many fields are derivatives of the legacy fields. In most cases, legacy field values are mapped to CDA fields.

HCP fields

The following CDA fields have been added for the HCP object.

Managed by Veeva OpenData

These CDA fields and their values are managed by OpenData.

Field Name	Label	Field Type	Reference Type
veevaid__v	Veeva ID	Text	
first_name_cda__v	First Name (CDA)	Text	
last_name_cda__v	Last Name (CDA)	Text	
middle_name_cda__v	Middle Name (CDA)	Text	

Field Name	Label	Field Type	Reference Type
prefix_cda__v	Prefix (CDA)	Text	
suffix_cda__v	Suffix (CDA)	Text	
language_cda__v	Primary Language (CDA)	Reference	LanguageCDA
email_cda__v	Primary Email (CDA)	Text	
mobile_phone_cda__v	Mobile Phone (CDA)	Text	
office_phone_cda__v	Office Phone (CDA)	Text	
fax_cda__v	Fax (CDA)	Text	
country_cda__v	Country (CDA)	Reference	AddressCountryCDA
hcp_type_cda__v	Type (CDA)	Reference	HCPTTypeCDA
nhid_cda__v	National Healthcare ID (CDA)	Text	
spec_1_cda__v	Primary Specialty (CDA)	Reference	HCPSpecialtyGroupCDA
all_spec_cda__v	All Specialties (CDA)	Reference (Multivalued)	HCPSpecialtyCDA
spec_group_1_cda__v	Primary Specialty Group (CDA)	Reference	HCPSpecialtyGroupCDA
all_spec_group_cda__v	All Specialty Groups (CDA)	Reference (Multivalued)	HCPSpecialtyGroupCDA
prescriber_cda__v	Prescriber (CDA)	Reference	Boolean Reference
degree_1_cda__v	Primary Medical Degree (CDA)	Reference	HCPMedicalDegreCDA
all_degree_cda__v	All Medical Degrees (CDA)	Reference (Multivalued)	HCPMedicalDegreCDA
status_cda__v	Status (CDA)	Reference	StatusCDA

Locally managed fields

These CDA fields and their values are managed in your Network instance. These are custom fields, but they have the __v suffix.

Field Name	Label	Field Type	Reference Type
level_cda__v	Level	Reference	LevelCDA
adopter_type_cda__v	Adopter Type	Reference	AdopterTypeCDA
kol_cda__v	Key Opinion Leader	Reference	BooleanReference
investigator_cda__v	Investigator	Reference	BooleanReference
speaker_cda__v	Speaker	Reference	BooleanReference
target_cda__v	Target	Reference	BooleanReference
year_of_birth_cda__v	Year of Birth (CDA)	Year	
age_range_cda__v	Age Range (CDA)	Reference	AgeRangeCDA
state_cda__v	State (CDA)	Reference	AddressStateCDA
city_cda__v	City (CDA)	Text	
postal_code_cda__v	Postal Code (CDA)	Text	

Address fields

The following CDA fields have been added for the Address object for HCPs.

Managed by Veeva OpenData

Field Name	Label	Field Type	Reference Type
street_address_1_cda__v	Street Address 1 (CDA)	Text	
street_address_2_cda__v	Street Address 2 (CDA)	Text	
country_cda__v	Country (CDA)	Reference	AddressCountryCDA

Field Name	Label	Field Type	Reference Type
state_cda__v	State (CA)	Reference	AddressStateCDA
city_cda__v	City (CDA)	Text	
postal_code_cda__v	Postal Code (CDA)	Text	
latitude_cda__v	Latitude (CDA)	Decimal Number	
longitude_cda__v	Longitude (CDA)	Decimal Number	
phone_cda__v	Phone (CDA)	Text	
fax_cda__v	Fax (CDA)	Text	
status_cda__v	Status (CDA)	Reference	StatusCDA
business_cda__v	Business (CDA)	Boolean	BooleanReference

Locally managed fields

These CDA fields and their values are managed in your Network instance. These are custom fields that have the __v suffix.

Field Name	Label	Field Type	Reference Type
home_cda__v	Home	Boolean	BooleanReference
billing_cda__v	Billing	Boolean	BooleanReference
shipping_cda__v	Shipping	Boolean	BooleanReference
sample_shipping_cda__v	Sample Shipping	Boolean	BooleanReference
primary_cda__v	Primary (CDA)	Primary	BooleanReference

For more details, see the [Common Data Architecture \(CDA\)](#) topic in the *Veeva Network 24R2 Release Notes*.

Data privacy opt out

Veeva OpenData now manages HCP opt outs in the following country:

- Taiwan (TW)

Two data model fields have been enabled for these countries for the HCP object:

- `data_privacy_opt_out__v`
- `data_privacy_opt_out_date__v`

Records that are opted-out by Veeva OpenData do not display and cannot be accessed in downstream systems. This ensures data privacy for opted-out HCPs to satisfy regional regulatory requirements.

The `opt_out__v` field is also enabled for Taiwan. This field indicates that the HCP wants to opt-out of OpenData. It is informational only.

Opted-out countries

To review the list of opted-out countries, in the Admin console:

1. Click **Data Model > Data Domains** and choose the **Customer Master** domain.
2. Select the **Health Care Professional** object and find the `data_privacy_opt_out__v` field in the **Fields** section.
3. Click the field to review the list of opted-out countries that are managed by Veeva OpenData.

Field updates for all countries

Language field

The definition of the `language__v` field is updated for HCP and HCO objects.

New Definition	Previous Definition
A preferred language refers to the language in which the person/people communicate based on their geological location or other source.	Preferred language spoken.

Residential Delivery field

The definition of the `residential_delivery__v` field is updated for the Address object.

New Definition	Previous Definition
This field indicates whether the input address is a residential address or a business address. Value returned after going through CASS.	This field indicates whether the input address is a residential address or a business address. Value returned after going through CASS.
Field Values: Y – Residential N – Business (blank) – CASS did not return a value	Field Values: Y – Residential N – Business (blank) – Invalid Address

ID field labels

Label translations are updated for the following fields.

Field Name	Language Code	Existing Localized Label	New Localized Label

Field updates for Asia Pacific

South Korea

The following reference type field is added to the License object:

- `licensing_body__v` – Licensing body

Additional field details

Managed by OpenData? No. This is an existing field, so it will not be managed by OpenData by default.

Immediate data impact? No. Enabling this field in your Network instance will not result in immediate data updates.

Profile layouts The field is automatically added to standard profile layouts.
It must be added to custom profile layouts created for this country.

A new reference code is added to the **LicensingBody** reference type for South Korea.

Reference Code	Definition (en)	Label (en)	Label (ko)
HIRA	The Health Insurance Review and Assessment Service is a government agency under Ministry of Health and Welfare responsible for claims review and quality assessment of the National Health Insurance.	Health Insurance Review & Assessment Service	건강보험심사평가원

Field updates for China

Healthcare Provider ID field

The `healthcare_provider_id__v` field has been added to the HCP object for the following countries or regions:

- Hong Kong (HK)
- Macao (MO)
- Taiwan (TW)

Additional field details

Managed by OpenData?	No. This is an existing field, so it will not be managed by OpenData by default.
Immediate data impact?	No. Enabling this field in your Network instance will not result in immediate data updates.
Profile layouts	The field is automatically added to standard profile layouts. It must be added to custom profile layouts created for these countries or regions.

Business Type field

The `business_type__v` field has been added to the HCO object for the following countries or regions:

- Hong Kong (HK)
- Macao (MO)
- Taiwan (TW)

Additional field details

Managed by OpenData?	No. This is an existing field, so it will not be managed by OpenData by default.
Immediate data impact?	No. Enabling this field in your Network instance will not result in immediate data updates.
Profile layouts	The field is automatically added to standard profile layouts. It must be added to custom profile layouts created for these countries or regions.

Field updates for EMEA

Professional Activity Mode field

The `professional_activity_mode__v` field has been added to the HCP object for the following countries:

- Germany (DE)
- Italy (IT)
- Portugal (PT)
- Spain (ES)
- United Kingdom (GB)

Additional field details

Managed by OpenData?	No. This is an existing field, so it will not be managed by OpenData by default.
Immediate data impact?	No. Enabling this field in your Network instance will not result in immediate data updates.
Profile layouts	The field is automatically added to standard profile layouts. It must be added to custom profile layouts created for these countries.

Registration ID field

The `registration_id__v` field has been added to the HCP object for the following countries:

- Bahrain (BH)
- Qatar (QA)
- United Arab Emirates (AE)

Additional field details

Managed by OpenData?	No. This is an existing field, so it will not be managed by OpenData by default.
Immediate data impact?	No. Enabling this field in your Network instance will not result in immediate data updates.
Profile layouts	The field is automatically added to standard profile layouts. It must be added to custom profile layouts created for these countries.

**Prefix field**

The `prefix__v` field has been added to the HCP object for the following countries:

- Kazakhstan (KZ)
- Ukraine (UA)

Additional field details**Managed by OpenData?**

No. This is an existing field, so it will not be managed by OpenData by default.

Immediate data impact?

No. Enabling this field in your Network instance will not result in immediate data updates.

Profile layouts

The field is automatically added to standard profile layouts.
It must be added to custom profile layouts created for these countries.

Global data updates

The following sections describe reference data considerations and updates for applicable regions.
