Data governance

The data governance document describes data changes introduced in this release as of the publication date of this document.

Adding new fields to your Veeva OpenData subscription

When Veeva OpenData adds new fields to a country that you are subscribed to, you can add the field to the subscription so that it's ready to receive data and be managed by Veeva OpenData.

For information about adding new Veeva OpenData fields to your subscription, see the topic called [Adding Veeva OpenData fields](#) in the *Veeva Network Online Help*.

Enabling Veeva OpenData fields for extended use

Veeva OpenData fields can be enabled to load local data or third party data. A field can be managed by Veeva in some countries, managed by a third party source in other countries, or be owned by a customer in the remaining countries.

Administrators can view ownership of the data model fields, by country, in the Network user interface by navigating to **Data Model** and choosing the **Customer Master** data domain. Click **Export Data Model** or select an object to view specific field details.

For more information about enabling Veeva OpenData fields for local or third party data use, see the topic called [Enabling data model fields](#) in the *Veeva Network Online Help*.

Field updates for China

Veeva Link URL field

The `veeva_link_url__v` field has been added to the HCP object for the following countries or regions:

- China (CN)
- Hong Kong (HK)
- Macao (MO)
- Taiwan (TW)

Additional field details

Managed by OpenData?	No. This is an existing field, so it will not be managed by OpenData by default.
Immediate data impact?	No. Enabling this field in your Network instance will not result in immediate data updates.
Profile layouts	The field is automatically added to standard profile layouts. It must be added to custom profile layouts created for these countries or regions.

Field updates for EMEA

Botswana

The following fields have been added to the HCO object:

- `fax_1__v`
- `fax_2__v`

Additional field details

Managed by OpenData?	Yes. These are existing fields that are already managed by OpenData.
Immediate data impact?	Yes. Enabling these fields in your Network instance will result in immediate data updates.
Profile layouts	The fields are automatically added to standard profile layouts. They must be added to custom profile layouts created for this country.

Canada

The following field has been added to the HCP object:

- `opt_out__v`

Additional field details

Managed by OpenData?	No. This is an existing field, so it will not be managed by OpenData by default.
Immediate data impact?	No. Enabling this field in your Network instance will not result in immediate data updates.
Profile layouts	The field is automatically added to standard profile layouts. It must be added to custom profile layouts created for these countries or regions.

Field updates for LatAm

HCO Focus Area fields

The following set of fields have been added to the HCO object for all countries supported by OpenData in Latin America.

- `hco_focus_area_1__v` to `hco_focus_area_10__v`

Additional field details

Managed by OpenData?	No. These are existing fields, so they will not be managed by OpenData by default.
Immediate data impact?	No. Enabling these fields in your Network instance will not result in immediate data updates.
Profile layouts	The fields are automatically added to standard profile layouts. They must be added to custom profile layouts created for these countries.

Field updates for the US

Default values

The default values have been removed for the following HCO fields:

Field	Default Value
lab_services__v	N
training_facility__v	N
xray_services__v	N

Global data updates

The following sections describe reference data considerations and updates for applicable regions.

ARMENIA

The following changes have been applied:
