Data governance

The data governance document describes data changes introduced in this release as of the publication date of this document.

Adding new fields to your Veeva OpenData subscription

When Veeva OpenData adds new fields to a country that you are subscribed to, you can add the field to the subscription so that it's ready to receive data and be managed by Veeva OpenData.

For information about adding new Veeva OpenData fields to your subscription, see the topic called [Adding Veeva OpenData fields](#) in the *Veeva Network Online Help*.

Enabling Veeva OpenData fields for extended use

Veeva OpenData fields can be enabled to load local data or third party data. A field can be managed by Veeva in some countries, managed by a third party source in other countries, or be owned by a customer in the remaining countries.

Administrators can view ownership of the data model fields, by country, in the Network user interface by navigating to **Data Model** and choosing the **Customer Master** data domain. Click **Export Data Model** or select an object to view specific field details.

For more information about enabling Veeva OpenData fields for local or third party data use, see the topic called [Enabling data model fields](#) in the *Veeva Network Online Help*.

Field updates for all countries

HCO Type Local field

The `hco_type_local__v` field has been added to the HCO object.

The field update applies to all OpenData countries except for the following countries:

- Belarus (BY)
- Burkina Faso (BF)
- China (CN)
- Ethiopia (ET)
- Hong Kong (HK)
- Japan (JP)
- Macao (MO)
- Madagascar (MG)
- Mali (ML)
- Russian (RU)
- Sierra Leone (SL)
- Tajikistan (TJ)
- Turkmenistan (TM)

Additional field details

Managed by OpenData?	Yes. This is a new field, so it will be managed by OpenData by default.
Immediate data impact?	Yes. Enabling this field in your Network instance might result in immediate data updates.
Profile layouts	The field is automatically added to standard profile layouts. It must be added to custom profile layouts created for the US.

This reference field uses the new **HCOTypeLocal** reference type. It includes many new reference codes.

To view the reference codes:

1. In the Admin console, click **Data Model > Reference Data**.
2. Click the **HCOTypeLocal** reference type to open the Reference Codes page.

Field updates for APAC

Neighborhood Code field

The `neighborhood_code__v` field has been added to the Address object for the following countries:

- India (IN)
- Singapore (SG)

Additional field details

Managed by OpenData?	No. This is an existing field, so it will not be managed by OpenData by default.
Immediate data impact?	No. Enabling this field in your Network instance will not result in immediate data updates.
Profile layouts	The field is automatically added to standard profile layouts. It must be added to custom profile layouts created for these countries.

Taiwan

The following field has been added to the HCP object:

- `grade__v` – The grade or rank of the HCP as defined by the national healthcare authority.

Additional field details

Managed by OpenData?	No. This is an existing field, so it will not be managed by OpenData by default.
Immediate data impact?	No. Enabling this field in your Network instance will not result in immediate data updates.
Profile layouts	The field is automatically added to standard profile layouts. It must be added to custom profile layouts created for this country.

Field updates for EMEA

Namibia

The following field has been added to the HCP object:

- `registration_id__v` - Registration ID.

Additional field details

Managed by OpenData?	No. This is an existing field, so it will not be managed by OpenData by default.
Immediate data impact?	No. Enabling this field in your Network instance will not result in immediate data updates.
Profile layouts	The field is automatically added to standard profile layouts. It must be added to custom profile layouts created for this country.

Kazakhstan

The following field has been added to the HCO object:

- `organization_id__v` - Hospital Organization ID.

Additional field details

Managed by OpenData?	No. This is an existing field, so it will not be managed by OpenData by default.
Immediate data impact?	No. Enabling this field in your Network instance will not result in immediate data updates.
Profile layouts	The field is automatically added to standard profile layouts. It must be added to custom profile layouts created for this country.

Field updates for the US

Academic status field

The `academic_status__v` field has been added to the HCO object.

Additional field details

Managed by OpenData?	Yes. This is a new field, so it will be managed by OpenData by default.
Immediate data impact?	Yes. Enabling this field in your Network instance might result in immediate data updates.
Profile layouts	The field is automatically added to standard profile layouts. It must be added to custom profile layouts created for the US.

This reference field uses the new **AcademicStatus** reference type with the following codes:

Network Code	EN Label	Description
ACAD	Academic	Identifies a facility that is associated with an academic institution, often focused on specialized care and research.
COMM	Community	Identifies a facility that provides general healthcare services to the local community.
NAPPL	Not Applicable	Indicates that the distinction between academic and community does not apply to this record.
BOTH	Academic and Community	A designation for a facility that serves both academic and community functions.

Global data updates

The following sections describe reference data considerations and updates for applicable regions.

ANGOLA

Global data inactivations

The following sections list reference codes that have been inactivated by Veeva OpenData for the countries listed. Veeva OpenData does not use these codes in their data; you may choose to update reference code mappings accordingly unless they are required by your own data.

ALL COUNTRIES

The following changes have been applied:

Object	Field	Reference Type	Code	Description (EN)
Address	administrative_area__v	AddressAdminArea	KZ-AKM	Aqmola Region (KZ-AKM)
