Data governance

The Veeva Network 5.0 Data Governance describes all data changes introduced since Veeva Network 4.0.

Network Provider Database

Network Provider Database is applicable to the following countries only.

UNITED STATES

Veeva Network Provider Database for the United States combines 384 authoritative sources of data into one de-duplicated, verified, and highly trusted view of HCPs and HCOs:

- All state medical boards
- AMA and other membership groups
- DEA
- NPPES/NPI
- All CMS Sources
- Many proprietary sources
- Over 700,000 outbound telephone calls annually

The data set includes special attributes such as:

- Compliance attributes (state and federal licensing, NPI)
- 340b relationships and contract numbers/dates
- Class of Trade for organizations
- Best of breed attributes (address, specialty, degree, name)
- Kaiser flag on HCO and HCPs
- DEA business activity codes on DEA licenses
- Gold State license flag to indicate best license for a State or provider

The full data set contains healthcare organizations (including direct patient care facilities), healthcare providers (including prescriber and non-prescriber healthcare professionals), provider to org affiliations, and org to org affiliations.

CHINA

The sources of data for China include National and Provincial Ministries of Health data, hospital web sites and Veeva data stewards.

The full data set contains healthcare professionals, healthcare organizations (including Class I, II, and III hospitals), and channels (including wholesalers and drug stores).
