Data governance

The data governance document describes data changes introduced in this release as of the publication date of this document.

Adding new fields to your Veeva OpenData subscription

When Veeva OpenData adds new fields to a country that you are subscribed to, you can add the field to the subscription so that it's ready to receive data and be managed by Veeva OpenData.

For information about adding new Veeva OpenData fields to your subscription, see the topic called [Adding Veeva OpenData fields](#) in the *Veeva Network MDM Online Help*.

Enabling Veeva OpenData fields for extended use

Veeva OpenData fields can be enabled to load local data or third party data. A field can be managed by Veeva in some countries, managed by a third party source in other countries, or be owned by a customer in the remaining countries.

Administrators can view ownership of the data model fields, by country, in the Network MDM user interface by navigating to **Data Model** and choosing the **Customer Master** data domain. Click **Export Data Model** or select an object to view specific field details.

For more information about enabling Veeva OpenData fields for local or third party data use, see the topic called [Enabling data model fields](#) in the *Veeva Network MDM Online Help*.

Data Governance document updates

There have been no changes to the reference data since the Data Governance document was published for the 26R2.1 Early release.

Field updates for all countries

Read-only fields

The following fields have been updated to be read-only:

Field Name	Field Label	Object
Latitude (CDA)	latitude_cda__v	Address
Longitude (CDA)	longitude_cda__v	Address
Specialty Group (CDA)	spec_group_1_cda__v	HCP

Field updates for the United States

Read-only field

The following field has been updated to be read-only:

Field Name	Field Label	Object
Metropolitan (CBSA)	cbsa__v	Address

Global data updates

The following sections describe reference data considerations and updates for applicable regions.

CHINA

The following changes have been applied:

Object	Field	Reference Type	Code	Description (EN)	Translation
HCP, HCO	specialty_1__v to specialty_10__v	Specialty	DR	Diagnostic Radiology	

HONG KONG

The following changes have been applied:

Object	Field	Reference Type	Code	Description (EN)	Translation
HCP, HCO	specialty_1__v to specialty_10__v	Specialty	DR	Diagnostic Radiology	

MACAO

The following changes have been applied:

Object	Field	Reference Type	Code	Description (EN)	Translation
HCP, HCO	specialty_1__v to specialty_10__v	Specialty	DR	Diagnostic Radiology	

Global data inactivations

The following sections list reference codes that have been inactivated by Veeva OpenData for the countries listed. Veeva OpenData does not use these codes in their data; you may choose to update reference code mappings accordingly unless they are required by your own data.

HONG KONG

The following changes have been applied:

Object	Field	Reference Type	Code	Description (EN)
HCP, HCO	specialty_1__v to specialty_10__v	Specialty	100	Functional Exam
