Data governance

The data governance document describes data changes introduced in this release as of the publication date of this document.

Adding new fields to your Veeva OpenData subscription

When Veeva OpenData adds new fields to a country that you are subscribed to, you can add the field to the subscription so that it's ready to receive data and be mastered by Veeva OpenData.

For information about adding new Veeva OpenData fields to your subscription, see the topic called *Adding Veeva OpenData fields* in the *Veeva Network Online Help*: <https://docs-vdm.veevanetwork.com/doc/vndocad/Content/Home.htm>.

Enabling Veeva OpenData fields for extended use

Veeva OpenData fields can be enabled to load local or third party master data. A field can be Veeva-mastered in some countries, mastered by a third party source in other countries, or be owned by a customer in the remaining countries.

Administrators can view ownership of the data model fields, by country, in the Network user interface by navigating to **Data Model > Network Data Model**. For more information about enabling Veeva OpenData fields for local or third party data use source, see the topic called *Enabling data model fields* in the *Veeva Network Online Help*.

Global data updates

The following sections describe reference data considerations and updates for applicable regions.

NEW COUNTRIES SUPPORTED

A data model has been added for four new countries for the EU:

- Croatia (HR)
- Latvia (LV)
- Lithuania (LT)
- Romania (RO)

The reference data is based on the EU master data model.

To view the data model for these new countries, in the Admin console, click **Data Model > Network Data Model**. On the Network Data Model page, expand the **Country** list and select the country.

Reference data is translated for the languages for these countries in the Network UI: Croatian, Latvian, Lithuanian, Romanian. In addition, Slovenian is also translated for reference data.

ADDITIONAL FIELD FOR SOME EU COUNTRIES

Additional field for some EU countries

The following field has been added for the HCP and HCO entities in many European countries:

- `language__v` – Preferred language spoken.

This is an existing field.

The field has been added to the data model for the following countries:
