Data governance

The data governance document describes data changes introduced in this release as of the publication date of this document.

Adding new fields to your Veeva OpenData subscription

When Veeva OpenData adds new fields to a country that you are subscribed to, you can add the field to the subscription so that it's ready to receive data and be mastered by Veeva OpenData.

For information about adding new Veeva OpenData fields to your subscription, see the topic called [Adding Veeva OpenData fields](#) in the *Veeva Network Online Help*.

Enabling Veeva OpenData fields for extended use

Veeva OpenData fields can be enabled to load local or third party master data. A field can be Veeva-mastered in some countries, mastered by a third party source in other countries, or be owned by a customer in the remaining countries.

Administrators can view ownership of the data model fields, by country, in the Network user interface by navigating to **Data Model > Network Data Model**. For more information about enabling Veeva OpenData fields for local or third party data use source, see the topic called [Enabling data model fields](#) in the *Veeva Network Online Help*.

Data governance updates

No reference data updates have been added since the Sandbox version.

Global data updates

The following sections describe reference data considerations and updates for applicable regions.

NEW FIELDS

The following field has been added to the address object for the United States (US) and Canada (CA):

- `building_identifier__v` - An OpenData managed identifier that can be used to find similar addresses. It is a combination of the values in the premise, thoroughfare and postal_code fields.

LICENSE FIELDS FOR THE UNITED STATES (US)

The following field has been added for the license object:

- `license_certification__v` – A credential or certification added to a license by a licensing board that qualifies an HCP to provide services beyond those granted to the HCP's primary qualifying degree and examination.

This is a reference type field. The reference list is called `LicenseCertification`.

The following reference values are included in the reference list:

- CRNA – Certified Registered Nurse Anesthetist Practitioner
- CNM – Certified Nurse Midwife
- GLAUC – Glaucoma Prescribing Certification

Changes have been made to the following license fields:

- `license_eligibility__v` – The English label and description are updated.

Previous English Label and Description	New English Label and Description
Label: License Eligibility	Label: Prescriptive Authority
Description: Eligibility code of license.	Description: Reflects HCP's prescriptive authority eligibility by state/degree/credential. Considers expiration date/grace period and license status and conditions.

- `rxa_eligible__v` – The English description is updated.

Previous Description	New Description
These rules are the same as License Eligibility (see that field) but exclude the expiry date.	Reflects HCP's sampling authority eligibility by state/degree/license. Considers expiration date/grace period and license status and conditions.
