Veeva Network 25R2.0.2 Patch Release Notes

August 2025

Contents

Issues resolved in this release

This patch resolves the following issues:

- In some situations, errors occur after changing the sequence format in an alternate key rule.

- Custom user groups cannot be saved in a DCR Approval Rule configuration.

- For Vault CRM and Veeva CRM integrations, if transformation rules are configured in Network, an error occurs in Network Account Search when HCPs have duplicate affiliations.
